Crossword Puzzle: SEQUENCE EVENTS by Charles Deber

Charles Deber is a Professor of Biochemistry at the University of Toronto and Senior Scientist in the Research Institute at the Hospital for Sick Children in Toronto. When not researching proteins, his hobbies include constructing crossword puzzles, many of which have been published in the New York Times and other newspapers.

In this puzzle, the bolded clues represent PDB IDs (e.q. 2rh1; use them to search the Protein Data Bank on rcsb.org) and Molecule of the Month articles (e.g. MotM April '08; use MotM index by date at **pdb101.rcsb.org**).
