

*In this game players compete to match the most drugs to protein targets*

The deck features 15 pairs of matching drugs (A) and protein targets (B), each represented twice for 60 cards total. Each card has a **NAME** and a **TYPE**.

The **NAME** is listed on the top in the colored stripe (C). The NAME of the matching card is listed underneath on the white stripe (D). The **TYPE** (E) is identified by both a distinct color and a unique icon in the upper left corner of the card. There are six different card TYPES that encompass three varieties of target-drug pairing: Cancer (navy) to Anticancer (cyan), Bacteria (red) to Antibiotic (orange), and Virus (green) to Antiviral (lime green).
